PROFESSIONAL SUMMARY

Aspiring Data Analyst with strong skills in data analysis, statistical techniques, and visualization. Proficient in Python, SQL, Excel, and Power BI. Hands-on experience in data pre-processing, exploratory data analysis, and applying machine learning techniques for insight generation.

EDUCATION

Indian Institute of Technology Patna

2023 – 2027

Bachelor of Science in Computer Science and Data Analytics

CPI: 9.06/10

Relevant Coursework: Data Structures, DBMS, Statistics, Data Analytics

SKILLS

Programming: Python, SQL, Java

Data Analysis: Exploratory Data Analysis, KPI Tracking, Statistical Analysis

Visualization: Power BI, Excel, Matplotlib

Machine Learning: ML Basics, Insight Generation, Data Preprocessing

Tools: Pandas, NumPy, MySQL, Git, GitHub, VS Code

EXPERIENCE

Data Analytics Research Intern, IIT Bhilai

Jan 2026 – Apr 2026

- Performed data preprocessing and cleaning on structured datasets using Python
- Conducted exploratory data analysis to identify patterns and trends
- Applied machine learning techniques to generate actionable insights
- Solved analytical problems using statistical approaches
- Developed visualizations to communicate insights effectively

PROJECTS

E-commerce Sales Data Analysis Dashboard

- Cleaned and preprocessed large transaction-level sales datasets by handling missing values, removing duplicates, and standardizing formats to ensure data consistency and reliability
- Performed detailed exploratory data analysis to identify revenue trends, seasonal patterns, and customer purchasing behavior across different product categories
- Built interactive and dynamic dashboards using Power BI with filters and KPIs to track performance metrics such as sales growth, top products, and customer segments
- Generated actionable insights that can help businesses optimize pricing strategies, inventory management, and customer targeting for improved revenue

SQL-Based Business Insights Project

- Extracted and analyzed structured datasets using advanced SQL queries including joins, aggregations, and subqueries to derive meaningful business insights
- Designed and implemented key performance indicators such as customer retention rate, revenue trends, and sales distribution for performance evaluation
- Built structured dashboards and reports to monitor business metrics and support data-driven decision making processes
- Improved analytical understanding by translating raw data into clear insights that can guide business strategy and operational improvements

Web Scraping and Sentiment Analysis

- Collected real-time news and textual data using web scraping techniques and automated data extraction pipelines
- Cleaned, processed, and structured unorganized datasets using Python libraries to prepare data for analysis and modeling
- Performed sentiment analysis using natural language processing techniques to identify trends, patterns, and public opinion shifts
- Visualized results using charts and graphs to clearly communicate insights and support interpretation of complex data

CERTIFICATIONS

IBM Data Analytics
Deloitte Australia Data Analytics
Tata GenAI Powered Data Analytics

ACHIEVEMENTS

Selected for McKinsey Solve Assessment
Media and PR Coordinator, TEDx IIT Patna
NSS Coordinator
